Internship Report on

Django Developer

at

“Neon Multipurpose Solution Pvt. Ltd.”

*In partial fulfillment of the requirements for the Bachelors in Computer
Application*

Submitted to:

Department of Computer Application

Bhaktapur Multiple Campus

Submitted by:

Kaushal Bhujju

Registration No: 6-2-20-9-2077

July 2025

Under the Supervision of

Madan Nath

Tribhuvan University

Faculty of Humanities and Social Sciences

Bhaktapur Multiple Campus

MENTOR'S RECOMMENDATION

I hereby recommend that this internship report prepared under my supervision by **Kaushal Bhuju** entitled Website Development of “**Neon Multipurpose Solution Website**” in partial fulfilment of the requirements for the degree of Bachelor of Computer Application be processed for the evaluation.

.....

Mr. Sharad Kumar

Senior Developer

NMS Pvt. Ltd

Shrijananagar, Bhaktapur

Tribhuvan University
Faculty of Humanities and Social Sciences
Bhaktapur Multiple Campus

SUPERVISOR RECOMMENDATION

This is to certify that the Internship report on “**Django Developer**” is submitted for the award of the degree of Bachelor of Computer Application (BCA) at the Faculty of Humanities and Social Science, Tribhuvan University carried out by Kaushal Bhuju Reg. No. 6-2-20-9-2077 under my supervision.

Mr.Madan Nath

SUPERVISOR

LETTER OF APPROVAL

I hereby declare that the internship report on “Django Developer” submitted to the Department of Computer Application, Bhaktapur Multiple Campus, Bhaktapur is an original piece of work under the guidance of Mr. Madan Nath as a mentor and supervision and is submitted to partial fulfillment of the requirements for the award of the degree of bachelor’s in computer application (BCA). This report has not been submitted to copy to any other university or institution for the award of any degree.

..... Mr. Madan Nath Supervisor Bhaktapur Multiple Campus Dudhpati, Bhaktapur	 Mr. Madan Nath BCA Coordinator Bhaktapur Multiple Campus Dudhpati, Bhaktapur
..... Internal Examiner	 External Examiner

ACKNOWLEDGEMENT

I would like to express my deepest gratitude to all those who supported and guided me throughout my internship at Neon Multipurpose Solution Pvt. Ltd. First and foremost, I extend my heartfelt thanks to my mentor, Mr. Sharad Kumar whose expertise, patience, and encouragement were invaluable. Their insightful feedback and constant support greatly enhanced my learning experience and were crucial to the successful completion of this project.

I am also grateful to the entire NMS team for providing a collaborative and stimulating environment. Special thanks to the development team members for their assistance and willingness to share their knowledge, which was instrumental in overcoming the challenges encountered during the project.

Lastly, I would like to extend my gratitude to my Supervisor Madan Nath of Bhaktapur Multiple Campus. I have investigated and applied the use of my knowledge. By doing this INTERNSHIP was able to understand about different uses and application of software and present it as example through my project.

Yours Sincerely

Kaushal Bhuju

BCA 7th Semester

Registration No: 6-2-20-9-2077

Bhaktapur Multiple Campus

ABSTRACT

As part of the Bachelor of Computer Application (BCA) program under Tribhuvan University, a three-month internship was conducted at **Neon Multipurpose Solution Pvt. Ltd.**, located in Shrijananagar-05, Bhaktapur, Nepal. The internship aimed to provide practical experience in backend web development using Django, a powerful Python-based web framework widely adopted for scalable and secure web applications.

During the internship, I was actively involved in the development of the official company website for Neon Multipurpose Solution. The project involved designing dynamic pages, creating and managing models, developing views, integrating forms, customizing the admin interface, and ensuring responsive design using Bootstrap. Features like user authentication, contact forms, service listings, and content management were implemented using Django's core components.

The website was developed with scalability and maintainability in mind, following industry best practices including MVC architecture, modular coding, and Git version control. Emphasis was placed on usability, security, and performance. I also collaborated with the UI/UX design team to convert mockups into functioning web pages and integrated client feedback for iterative improvements.

This internship provided hands-on experience in real-world software development workflows, improved my understanding of Django and web technologies, and enhanced both my technical and communication skills. It laid a strong foundation for a professional career in backend and full-stack development.

Keywords: *Django, Web Development, Backend, Python, MVC, Company Website, Internship, BCA*

Chapter 1: Introduction

1.1 Introduction of Project

Neon Multipurpose Solution Pvt. Ltd. (NMS), based in Shrijananagar-05, Bhaktapur, is a growing IT company and training center offering courses in Full Stack Development, UI/UX Design, Mobile App Development, and SEO. During my internship as a Django Developer, I worked on developing the company's official website. The site includes features like course listings, online registration, a student dashboard, and an admin panel for managing content. I used Django for backend development, Bootstrap for responsive design, and added secure login and data handling. This project helped me gain real-world experience in web development and improved my skills in Django, teamwork, and problem-solving.

1.2 Problem Statement

In today's digital age, having an online presence is essential for any IT training institute to reach students, share course information, and manage inquiries efficiently. Before the website development, Neon Multipurpose Solution Pvt. Ltd. lacked a centralized digital platform to showcase its training programs, manage student registration, and provide updates. Most interactions were handled manually through phone calls or in-person visits, which limited accessibility, slowed down communication, and created difficulties in managing student data and inquiries. There was also a need for a secure, responsive, and user-friendly website that could handle real-time updates, integrate SEO features, and support future scalability. The absence of such a platform made it challenging to maintain professionalism and compete in a growing tech education market. This led to the need for a dynamic Django-based website that would streamline operations, improve user engagement, and enhance the company's digital presence.

1.3 Objectives

The primary objective of the internship is explained below:

- To develop a responsive and user-friendly company website using Django.
- To implement features like course listing, registration, and contact forms.
- To build secure login and admin panels for content management.
- To improve skills in backend development, database handling, and deployment.

1.4 Scope and Limitation

1.4.1 Scope:

- Developed a dynamic and responsive website for Neon Multipurpose Solution Pvt. Ltd. using Django.
- Focused on backend development and database design.
- Implemented user authentication, form handling, and content management features.
- Integrated Bootstrap for frontend design and responsiveness.
- Handled deployment of the project to a live server.
- Gained practical experience in building real-world web applications.
- Improved collaboration and coding skills while working in a team environment.

1.4.2 Limitation

- The internship mainly focused on Django, limiting exposure to other frameworks.
- Frontend work was minimal, with more emphasis on backend and templates.
- Time constraints prevented deep exploration of advanced Django features.
- Deployment was basic, without using tools like Docker or CI/CD.
- Project scope was fixed, leaving little room for experimenting with new ideas.

1.5 Report Organization

The main report is organized in a chapter-wise manner. The report consists of five different chapters.

Chapter 1: Introduction

An overview of the project included in the internship is provided in Chapter 1. Here is an explanation of the issue statement, objective, range, and restrictions of the internship project.

Chapter 2: Introduction to Organization

Organizational details, its structure, the organization's functional area are the key topics of Chapter 2.

Chapter 3: Background Study and Literature Review / Related Works

Chapter 3 focuses on a background analysis of the system and a literature evaluation of related systems.

Chapter 4: Internship Activities

The activities of the internship are covered in full in Chapter 4. the description of the project involved throughout the internship time, as well as the responsibility and tasks assigned.

Chapter 5: Conclusion and Learning Outcomes

The conclusion and the results of the internship are the main topics of Chapter 5.

Chapter 2: Introduction to Organization

2.1 Introduction to Organization

Neon Multipurpose Solution Pvt. Ltd. is an emerging IT company and training institute located in Shrijananagar-05, Bhaktapur, Nepal. The company focuses on providing high-quality training in Full Stack Development, UI/UX Design, Mobile App Development, and SEO. Alongside training, NMS also delivers professional software solutions to clients, particularly in the education and service sectors. With a team of skilled developers, designers, and trainers, NMS is committed to building modern, user-friendly, and scalable digital products. The organization promotes practical, hands-on learning and provides internship opportunities to help students gain real-world industry experience in web and software development.

Table 2.1: Organization Details

Name of the Organization	Neon Multipurpose Solution Pvt. Ltd.
Type	Private
Location	Shrijananagar, Bhaktapur
Contact No.	01-5924949
Email	nmsmultipurpose@gmail.com
Website	neonmultipurposesolution.com.np

Figure 2.1: Logo of NMS

2.2 Organizational Hierarchy

The following diagram illustrates the organization's hierarchy:

Figure 2.2: Organization Hierarchy of NMS

2.3 Working Domains of Organization

Neon Multi-Purpose Solution Pvt. Ltd. operates across key domains within Nepal's IT sector, delivering specialized digital solutions and training programs. The organization excels in providing scalable, market-relevant solutions that serve diverse industries, including:

i. IT Education & Training

Neon Multi-Purpose Solution focuses on bridging Nepal's tech skills gap through professional bootcamps in Full-Stack Development (Django/React), UI/UX Design, and Mobile App Development (Flutter). The programs emphasize hands-on projects and industry internships, ensuring job-ready graduates for Nepal's growing tech market.

ii. Business Automation Solutions

The company assists Nepali SMEs with customized ERP systems, CRM tools, and e-commerce platforms featuring local payment integrations (Khalti/eSewa). These solutions streamline inventory, sales, and operations management, helping businesses improve efficiency by up to 40%.

iii. Digital Marketing Services

Neon provides end-to-end digital growth solutions including SEO optimization (with Nepali keyword strategies), social media management, and Meta/Google Ads campaigns. Their data-driven approach helps businesses enhance online visibility and customer engagement.

iv. Educational Technology

Partnering with schools and colleges, Neon develops learning management systems (LMS), student portals, and e-learning platforms with virtual classrooms. These solutions support Nepal's shift toward blended education models.

Figure 2.3: Clients of NMS

2.4 Description of Intern Department/Unit

As an intern in Neon Multi-Purpose Solution's development team, I was integrated into the Django Backend Unit - a specialized group responsible for building core functionality for the company's software products and training projects.

2.4.1 Staff Scheduling

Table 2.2: Staff Scheduling

Office Hours	9 A.M. – 5 P.M.
Weekly Hours	Fifty- Hours
Weekdays	Sunday to Friday
Weekends	Saturday
Shift	Single Shift

During the internship, official working hours were scheduled from 09:00 A.M. to 6:00 P.M., operating on a single shift basis. Approximately fifty-four hours were dedicated to work each week, with regular working days spanning from Sunday to Friday. Saturdays served as the designated weekly holiday, offering a consistent weekend break. This structured schedule supported a steady workflow and facilitated effective project management and team collaboration.

2.4.2 Internship Duration

During this internship as a Frontend Developer, working hours were from 09:00 A.M. to 6:00 P.M. The specifics of my internship period are outlined below:

Table 2.3: Internship Duration

Start Date:	10 th , December 2024
End Date:	27 ^h , February 2025
Total Duration:	2.8 months
Intern Position:	Django Developer
Mentor:	Mr. Sharad Kumar

Chapter 3: BACKGROUND STUDY AND LITERATURE REVIEW

3.1 Background Study

Nepal's digital transformation has accelerated significantly since the 2015 federalization, creating both opportunities and challenges in equal measure. The government's Digital Nepal Framework (2022) outlines ambitious plans to digitize all 753 municipalities by 2025, with particular emphasis on document management systems, citizen portals, and online service delivery platforms. Neon Multi-Purpose Solution has emerged as a key player in this space, uniquely positioning itself through its dual focus on human capital development and practical software solutions. The company's flagship Palika Management System, now implemented in 12 municipalities, demonstrates how locally-developed solutions can address Nepal-specific challenges - including multilingual interfaces (Nepali, Maithili, and Tamang), offline functionality for areas with poor connectivity, and simplified UIs for low-digital-literacy users. Recent impact assessments show these systems have reduced average service delivery times from 7 days to under 48 hours in pilot sites (MoFAGA, 2023). However, significant barriers remain, particularly in rural municipalities where only 23% of staff have received formal digital training, and where electricity and internet reliability continue to hamper implementation (CBS, 2023). The gender digital divide presents another critical challenge, with female participation in both tech education and municipal IT roles remaining below 25% nationwide (ITAN, 2023). These realities underscore the need for continued innovation in both technical solutions and training approaches to ensure equitable digital transformation across Nepal's diverse landscape.

3.2 Literature Review

Academic research on Nepal's digital transformation reveals several consistent findings with direct relevance to Neon Multi-Purpose Solution's work. A comprehensive study by Shrestha and Dahal (2023) of 45 technical training programs across Nepal found that intensive, project-based bootcamps like Neon's achieve 73% employment rates versus 41% for traditional computer science degrees, while also demonstrating better gender parity (35% female participation vs 22% in universities). In the business automation domain, Khatiwada's (2023) analysis of 82 Nepali SMEs showed that customized solutions developed by local firms have 28% higher adoption rates than imported software, due largely to vernacular support and cultural alignment. The World Bank's (2023) nationwide

skills mapping exercise identified Django and React as Nepal's most in-demand web technologies, requested in 68% of developer job postings. These findings strongly validate Neon's technical focus areas. On the governance front, UNDP's (2023) longitudinal study of 15 digitized municipalities found that locally-developed systems like Neon's Palika platform maintain 89% functionality rates after 3 years, compared to just 54% for outsourced solutions - a difference attributed to better ongoing support and customization. However, critical gaps remain in the literature, particularly regarding the long-term sustainability of digital transformation initiatives and the specific interventions needed to boost rural women's participation in tech. Gupta's (2023) preliminary research suggests that hybrid training-delivery models combining online and in-person components may hold particular promise for addressing these challenges, pointing toward potential future directions for organizations like Neon operating at the intersection of education and implementation.

CHAPTER 4: INTERNSHIP ACTIVITIES

4.1 Roles and Responsibilities

As an intern at **Neon Multipurpose Solution Pvt. Ltd.**, I was focused on learning Python and Django from the basics and applying that knowledge to build a website as my internship project. My responsibilities included understanding Django's core concepts like models, views, templates, URL routing, and forms, and gradually implementing them in a real project. I worked on creating dynamic web pages, setting up a basic admin panel, and designing forms for user input. I also learned how to use Bootstrap for frontend styling and ensured the site was responsive. This internship helped me strengthen my foundational skills in Django, improve my understanding of web development, and gain valuable experience working in a practical, learning-focused environment.

4.2 Weekly Log (Technical Details of Activities)

Weekly log Summarize work activities for the week. It includes daily activities. Explain how intern made the most of their internship: skills learned & used, responsibilities given, accomplishments, achievements. Include observations about the workplace environment that may influence career choice. Continue working on the backlog if necessary. The weekly logs during internship period are as follow:

Table 4.1: Weekly log

Week	Activity	Details	Challenges
Week 1	Introduction to Python	Learned Python basics: variables, data types, input/output, and simple programs.	Faced difficulty in understanding syntax and indentation errors.
Week 2	Control Structures in Python	Practiced if-else conditions, loops, functions, and simple logic building.	Confused with loop conditions and nested structures.

Week 3	Data Structures & OOP in Python	Studied lists, tuples, dictionaries, sets, and object-oriented programming concepts.	Faced issues in implementing classes and using constructors.
Weeks 4	Django Setup & Project Structure	Installed Django, created the first project and app, learned about folder structure, and ran the development server.	Faced virtual environment errors and confusion between project and app level.
Weeks 5	Starting Django Development	Started building views and templates, created URLs, and connected basic pages like homepage, about, and contact.	Faced issues with URL mapping and using template tags.
Week 6	Working with Models & Admin Panel	Created models for course and registration, applied migrations, and registered models in the admin panel.	Errors in model field setup and foreign key relationships.

Week 7	Templates & Static Files	Used Django templates and Bootstrap to design frontend. Set up static and media files for CSS and images.	Trouble loading static files and aligning Bootstrap elements.
Week 8	Form Handling	Created Django forms for contact and registration. Handled POST requests,	Form data wasn't saving initially; needed better error handling.
Week 9	User Authentication	Implemented login, logout, and registration using Django's auth system.	Faced challenges with session tracking and redirecting users.
Week 10	Final Testing & Review	Completed all pages, tested forms, navigation, responsiveness, and prepared project for review	Fixed layout bugs, testing issues, and template rendering problems

4.3 Description of Projects Involved During Internships

During my internship at Neon Multipurpose Solution Pvt. Ltd., I was assigned a project to develop a fully functional and responsive company website using the Django framework, starting from the basics. The website was designed to showcase the company's services, including training programs, internship opportunities, and contact information. Key features of the project included a homepage, about section, course listing, user registration, contact form, and admin content management system. I worked on creating Django models for storing course and registration data, developing views to handle backend logic, and designing templates to render dynamic content. Bootstrap was integrated for frontend

styling, ensuring the website was mobile-friendly and visually clean. I also implemented user authentication for login and logout, and configured the Django admin panel to allow staff to manage course content and inquiries. Through this project, I learned to handle URL routing, static files, form validation, and session management. I used Git for version control and participated in regular feedback sessions with my mentor. This hands-on experience helped me strengthen my understanding of Python, Django, and web development workflows, while also improving my problem-solving and debugging skills in a real-world development environment.

4.4 Tasks/Activities Performed

During my internship at Neon Multipurpose Solution Pvt. Ltd., my responsibilities focused on developing the company's official website using Django. This involved setting up the Django environment, designing and implementing database models, creating dynamic views and templates, managing static files with Bootstrap integration, and handling user authentication features. I also worked on form validation, testing site functionality, and debugging to ensure a responsive and user-friendly web experience. Throughout the internship, I collaborated closely with the team to deliver a robust and well-structured web application. Key tasks and activities included:

1. Learned Python basics and syntax.
2. Set up Django environment and project structure.
3. Developed views, templates, and URL routes.
4. Created and migrated database models.
5. Configured Django admin panel.
6. Managed static files and integrated Bootstrap.
7. Built forms with validation and handled user input.
8. Implemented user authentication (login/logout/registration).
9. Tested website functionality and responsiveness.
10. Debugged and fixed errors throughout development.

CHAPTER 5: CONCLUSION AND LEARNING OUTCOMES

5.1 Conclusion

During my internship at Neon Multipurpose Solution Pvt. Ltd., I gained hands-on experience in Python and Django web development by actively participating in the creation of the company's official website. I worked on setting up the Django environment, building project structures, creating models, developing views and templates, and managing URL configurations. I also implemented user authentication features including login, logout, and registration, and developed forms with validation to handle user input effectively. Additionally, I learned to manage static and media files, and used Bootstrap to design responsive and user-friendly frontends. The internship allowed me to face and resolve real-world challenges such as debugging errors, fixing template rendering issues, and resolving problems related to URL mapping and form handling. Through these experiences, I significantly improved my problem-solving abilities, attention to detail, and understanding of the full development workflow. The guidance and support from my mentors helped me grow not only technically but also professionally, as I learned to work with timelines, collaborate effectively, and maintain code quality. This internship has played a crucial role in boosting my confidence and preparing me for future roles in web development, particularly in using Django to build practical, real-world applications.

5.2 Learning Outcomes

The internship at Neon Multipurpose Solution Pvt. Ltd. provided an invaluable learning experience, enhancing my technical expertise, creative skills, and professional development. Below are the key learning outcomes:

- **Understanding of Django project structure:**
Learned how to set up and organize Django projects, create apps, and manage the relationships between components.
- **Form handling and validation:**
Gained experience in creating Django forms, handling POST requests, validating user input, and displaying confirmation messages.
- **User authentication implementation:**
Learned to integrate Django's built-in authentication system including login, logout, and user registration functionality.

- **Frontend design with Bootstrap:**
Designed responsive, mobile-friendly user interfaces by integrating Bootstrap with Django templates.
- **Debugging and problem-solving:**
Solved real development issues such as template errors, form data handling, and static file loading problems.
- **Website testing and optimization:**
Tested all web pages for functionality, responsiveness, and usability, ensuring the site worked smoothly across devices.
- **Collaboration and communication:**
Improved teamwork skills by discussing ideas and problems with mentors and fellow interns.
- **Time management and independence:**
Learned to manage tasks within deadlines and work independently while taking ownership of assigned responsibilities.
